Hightower

To whom it may concern,

Hightower is committed to material health and transparency, seeking to provide the healthiest products to our clients that are free of toxic chemicals. We are proud to offer products that adhere to certain guidelines set forth in International Living Future Institute's "Living Building Challenge Red List 3.1". This letter serves as a declaration that to the best of our knowledge and based on information provided to us by our suppliers, the following product(s) do not contain any intentionally-added chemicals on the "Living Building Challenge Red List 3.1" at or above the 100 ppm level.\*

## **Flote**

\*Flote uses composite wood containing formaldehyde, which is permitted under the LBC I10-E11 1/2009 Composite Wood Sheet Goods exception, and so Flote is Living Building Challenge Compliant. The composite wood is TSCA Title VI compliant, and the final product is Indoor Advantage Gold certified and CDPH compliant.

It is essential that any fabric applied to this product (whether COM or Graded-In) be vetted separately for Red List chemicals.

We will continue to optimize our supply chain and seek additional transparency on our products.

Signed,

Michaela Shaw
