Base Options

Black

Custom
(upcharges and
minimums apply)

- Contrasting fabric available
- Power available

*NOTE: any straight highback units are for modular layouts only, cannot be freestanding. Must eventually end with highback arms, highback corner units, highback 60° units, or a combination of those, on both ends.

• Poly / Vinyl Type Materials

Not allowed for upholstery on Adapt at this time, due to thickness, and telegraphing & puddling issues.

• Contrasting Fabrics

Allowed, with limitations. Fees & increased yardage apply, please request a quote.

• The unit pictured here is a “highback arm”

but when contrasting fabrics are specified, the separate parts are referred to as:

Inside & outside of any 1 individual... Arm · Back · Screen
***Must be from the same Fabricway* No exceptions**

But it **IS** okay to do completely different fabric families from **one entire unit to the next**

Cannot do contrasting seat spots on **multi-seat bench**

Same Fabricway = Same fabric, different colors

Any Straight Highback Units...

- Are for Modular Layouts only, cannot be freestanding.
- Must eventually end with Highback Arms, Highback Corner Units, Highback 60° Units, or a combination of those, on both ends.
- Cannot do tiered height connections with straight highback units because of these reasons.

60° Highback Units...

- Can be freestanding.
- Can tier back heights from one unit to the next.
- Can connect to straight or curved units.

- No, Low, and Mid Back heights can all tier.
- Tier height transitions can be random.

Example: Okay to have no back and midback side-by-side if preferred.

Flat Screen Brackets — For Connecting Mid & High Units, Side-By-Side

- Do not use on Lowback Units (also not optional)
- Required for Midback Units (IF connecting to another midback)
- Required for Highback Units (needed at both mid and high levels)
- Same rules above if connecting a Straight Unit to a 60° Curved Unit
- Don't need to connect 60° Curved Unit to another 60° Curved Unit, but optional

Corner Screen Brackets — For Connecting Mid & High Units, at 90° Meeting Points (Corners)

- Do not use on Lowback Units (also not optional)
- Required for Midback Units (IF connecting to another midback)
- Required for Highback Units (needed at both mid and high levels)

Seat to Seat Ganging — For Connecting Seats, Side-by-Side or at 90° Meeting Points

- Required for all Straight Highback Unit Seat Connections (straight to straight or straight to 60° curve)
- All other seat connections are optional, but strongly suggested

**Pivot Table Details:**

- 360° continuous rotating top (unless blocked by something like an arm).
- Location needs to be specified.
- Righthand standard (when seated), lefthand optional.
- Mid-Bench placement optional (attachment should not be blocked by another seat, table, or arm/back), basic marked-up image w/ preferred location needed.
- Default: Leg slides through table connecting plate, and share same attachment screws.
- Table column offset from leg column left or right by approx. 1.25".
- Installed Height when attached to a Leg: Approx. 27.125".
- Installed Height when attached to seat frame: Approx. 27.375".
- Simple installation required.
- Table does not fold down.
- **Table cannot** be freestanding.

**Ganging Table Details:**

- Table can only gang to seating units.
- Ganging brackets are included.
