

## Hightower™

## Suspence™ Lighting

A new addition to our lighting collection is Suspence™. Designed by Copenhagen-based studio GamFratesi, the inspiration for the series was how to translate movement into a physical shape. The shape of the lamp is literally created by pulling. This force is visible at the top of the lamp, where you see a tip. The soft, organic shape of Suspence™ is accented by a monochromatic style where the shade and cord are perceived as an uninterrupted whole. An infinity diffuser™ at the bottom of the lamp concentrates the light, prevents glare and creates an elegant optical illusion.

Available in two sizes and three colors (white, grey, copper), this pendant adds a simple statement to our ever-evolving lighting collection.
